

Module Title:	AMTRA Saddlers' SQP
Subject Group:	Animals
Module Author:	CA Ellis
Module Number:	
Credit Value:	15
Level:	Certificate
Pre-requisites:	Relevant Animal Health Industry Experience
Co-requisites:	NONE
Excluded Combinations:	AMTRA Manufacturers, AMTRA Distributors' SQP
Module Approval Date:	
Start and Expiry Date of Module:	
Courses for Which Module Validated:	<ul style="list-style-type: none"> • AMTRA Professional Short Course

Rationale and Context:

Animal medicines are vital for the care of horses and companion animals. These medicinal products are potent materials which need to be treated with respect to ensure that they are used to best effect and without causing harm to the animal, user, consumer or the environment. The manufacture, distribution and importation of medicinal products require an understanding and application of complex laws and regulations derived from the European Community Council Directives. The role of the Nominated Person within an animal health product retail outlet is critical to the safe distribution of animal medicines. The application of legislation coupled with an understanding of animal husbandry and underpinning animal health science are essential in the role is to be undertaken effectively.

This module addresses the college mission in promoting widening participation and the recognition of work related learning through the award of academic credit. It is designed to provide the underpinning knowledge and understanding required by those involved in the role of an animal medicine Suitably Qualified Person (SQP). Following completion of this module successful the candidate will be able to apply knowledge from areas as diverse as legislation, animal physiology, internal and external parasites of horses and companion animals to the animal medicines industry.

The outcomes outlined below map onto the AMTRA Distributors Training Manual. Candidates successful in the related AMTRA SQP qualification will satisfy the module outcome.

Intended Learning Outcomes:

1. Identify the legal framework within which an animal medicine distributors business operates
2. Understand basic anatomy and physiology of Horses, Cats and Dogs
3. Apply the principles of good merchandising practice as set out in the Code of Practice
4. Apply an understanding of internal and external parasites in Horses, Cats and Dogs to the sale and supply of animal health products

Indicative Content:

Legal framework: Medicines Act, Medicines (Exemptions for Merchants in veterinary Drugs) Order 1998, Veterinary Surgeons Act 1996, AMTRA Code of Practice and the Health and Safety at Work regulations.

Good Merchandising Practice: stock rotation, audit and record keeping, product labelling, storage requirements, disposal procedures and health and safety requirements.

Anatomy and Physiology: body systems including basic anatomy, circulatory, respiratory, digestive and defensive systems and its influence on good health in Horses, Cats and Dogs

Animal Health: Signs of good health, Causes of disease, methods of transmission, disease prevention, the operation of the immune system, parasitology, causes of nutritional disorder, notifiable diseases and the administration of animal medicine. Preventative medicine strategy and health plans.

Learning and Teaching Strategy:

- *Nature of student support*

Candidates for the AMTRA SQP examination are provided with a comprehensive training manual which forms the basis of the student support for the learning outcomes outlined above. This is augmented by the provision of tuition devised to address all areas of the module. Candidates will normally be employed in the animal health industry, within the distributor sector. Alternatively, candidates will have experience of production agriculture and/or be involved in the retail sector of the agriculture supply industry. Where neither of these prior experiences pertain, evidence of other relevant experience will be expected. Whilst these prior

experiences are not essential they will be a valuable asset in the pursuance of the module outcomes. Tuition will be in the form of small group delivery (normally less than 20 candidates in a group) supported by farm classes, tutorials and practical classes. Due to the mix of experiences found within groups the opportunity to meet in informal groups, provide valuable learning support in this module.

- *Pattern of study including links to other module delivery*

This course will normally be delivered in the form of a short course, of five day duration. An assignment will be set on registration. This assignment will be critical in enabling the candidates to apply their knowledge and understanding to a real case study.

- *Variations for different course groups*

It is not required that the candidates undertake formal tuition to achieve the module outcome. Candidates with greater experience may elect to study at a distance by means of the study pack. Employers may in some cases provide assistance in preparation for the assessment. The study pack will cover all elements of the module and include an assignment brief and study guidance.

Assessment Strategy:

- *Assessment format*
 - **Written Examination (100%)**, two hours in duration. Section A will be in the form of a series of short questions ranging across the module content. There will be a compulsory 'Legislation question requiring the candidates to demonstrate an ability to apply their knowledge and understanding of the legislation to the demands of the SQP. These examinations are marked by a HAUC Internal Examiner

- *Outcomes assessed*

All outcomes will be assessed by means of an examination
